OC-M-74-252
10 May 1974

MEMORANDUM FOR: Deputy Director for Management and Services
SUBJECT : Weekly Report

25X1C

25X1C
25X1C

25X1A

2. EUCOM J-6: Rear Admiral Donald T. Poe was briefed by OC on 8 May. He was especially interested in SKYLINK and was briefed on the exclusion of additional [redacted] power budget requirements in the [redacted] 1974-80 plan. He promised to acquaint himself with this problem. A briefing summary is being forwarded to Chief, [redacted]

25X1C
25X1C

3. [redacted] There were no unusual problems or developments related to communications support [redacted] this week although keeping abreast of his true itinerary gets a bit tricky at times.

4. SKYLINK Secure Voice: A clocking incompatibility between the Headquarters-U.S. Base microwave system and SKYLINK terminal equipment has delayed operational activation of SKYLINK secure voice service. Buffers are being installed; two-channel service should be available by the week of 20 May.

5. Cable Dissemination System (CDS): The OC programmer trainees assigned to the CDS project have completed the one week PDP-II phase and are now involved in the four week C8562 course. All are doing well at this point.

25X1A

6. VADAC-III: [redacted] has been notified to stop delivery of VADAC-III's due to a 100 percent failure rate in the five production units received thus far. Failure symptoms suggest a heat problem possibly associated with TEMPEST induced modifications.

~~CONFIDENTIAL~~

7. EOD Personnel: The target date for starting a new Telecommunications Specialist training course has slipped from 15 May to 10 June due to EOD processing delays. Thirty candidate names were submitted to OP. A minimum of 13 persons from this list are needed before a class can start.

8. Wide Area Telephone Service (WATS): WATS service has now been in use for a full year. A study just completed reveals that in FY-1974 a savings of \$55,000 will be realized as a result of our conversion to WATS service, even though long distance calls have increased. We will continue to monitor our usage of WATS and other long distance service and make changes as necessary in order to provide the most cost effective service to the Agency.

Planned Activities

Training:

25X1A
25X1A
